No	Question	Answer
1	What is exactly requested dimension of roof system? We guess that is 10x8m which is usual dimension regarding on the dimension of the stage 80m2	Requested dimension of roof system should be appropriate to match this type of stage with minimum dimensions of 8x6m and min 5m in height. We will add this in TD.
2	For the digital mixing console, you requested 2 pieces for this audio system? Or you need 1 digital mixing console with 2 stage box with 16-channel each? Please for clarifications	For the digital mixing console, we have requested 2 pieces for this audio system which was typewrite error. We need 1 digital mixing console with 1 stage box with 16-channels. We will make correction in TD
3	For the lighting control software and USB dongle is necessary the laptop? Do you have it or the bidder must include in the offer laptop?	For the lighting control software and USB dongle potential bidder does not have to include laptop in the offer just software as written in c4f_annexiitechspeciitechoffer_en.doc (page 4).
4	For the position RGBW LED PAR unit for measurement the light output is lumen per m2 which is the same as unit lux. We assume that is typewrite mistake and that is put lumen instead of lux?	For the position RGBW LED PAR we will make correction in TD to min 12x8W RGBW LED using power as requirement instead illumination in order to avoid eventual confusion.

5	For the position RGBW LED wash moving head, request for the LED power is 180W. Do you acceptable the moving head with the LED source 7x25W, in total 175W which is 2,8% less than requested power because for the stage it is not too significant?	For the position RGBW LED wash moving head, request for the LED power was 180W. We can accept the moving head with the LED source 7x25W, in total 175W which is 2,8% less than requested power because for the stage it is not too significant and will make correction in TD.
